Mace & Michael,
Since Rick's slipped out of oil spill work, I'm copying you on this so you know what's going on. It's a quick question about the tox tests we performed -- do they provide information about long-term health effects?

The attached grew out of the HHS meeting two weeks ago. I have edited to EPA text in the attachment but need you to revise the statement below - today, if possible.

Can you get Cindy in the loop sharing our document revision?

Subject: Draft press release

Thanks so much for these comments, Hal, we'll of course incorporate them.

We need another quick favor-- we've had a question from the Department on our draft press release, attached, related to the upcoming BP donation of funding. This is strictly close hold so please keep between us unless there is another key person at your agency who should look at it. Anyway, we've been asked,

"We would also like to know how this [the following statement] differs from what EPA already completed: 'Birnbaum also said the NTP will conduct chemical analysis and toxicology testing of the oil and dispersant mixture.'"

And we propose to respond:

(b) (5)

Do you see any major problems with that response?

It was great to meet you on the 19th. Thanks for any speedy help you can give,

Teri

Teri,

Please see the edited test below:

(b) (5)

Appendix B. Quick Reference to Existing Agency Data, Data and Collaboration Interests, and Resources

Agency Resources	Existing Data	Data Needs	Collaboration Interests
---	-----	-----	-----
EPA	Extensive air, water and sediment data posted publicly (http://www.epa.gov/bpspill/)		Ongoing discussions/data sharing with a number of sister agencies
	Also, some pre-spill, data from National Coastal Conditions Survey that may provide baselines.
